Office Action Summary	Application No. 09/920,083	Applicant(s) DELLA, MARCOS	
	Examiner Alicia Baturay	Art Unit 2155	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 1-23 are pending.
2. A telephone call was made to Jonathan Owens on 4 November 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 14, and 21-23, drawn to a web server architecture comprising a web interface for providing a plurality of data transmission paths to the web, classified in class 709, subclass 238.
 - II. Claims 4-13, 15-20, drawn to a method of building a web server support system comprising of downloading configuration files corresponding to each type of system component into the file server and transmitting the configuration file corresponding to each type of system component, classified in class 709, subclass 222.

Art Unit: 2155

4. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the Invention I does not require the method of downloading configuration files and transmitting the appropriate file to each type of system component. The subcombination has separate utility such as providing restricted and unrestricted data transmission paths to the web.
5. Because the inventions are distinct, each from the other for the reasons given above and the inventions have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.
6. Applicant is required under 35 U.S.C. 121 to elect a single group disclosed as described above for prosecution on the merits because each of the groups requires different searches in different subclasses.

Art Unit: 2155
